

# FALK® RELIABILITY PACKAGE

## FOR QUADRIVE® SHAFT-MOUNTED SPEED REDUCERS

### Quadrive

For A6 mounting only, as shown

#### ① AirMax® Pro Powered by Perceptiv™ Desiccant Breathers

The AirMax Pro includes a desiccant material that absorbs water and protects against moisture intrusion. It includes a smart monitoring system for easy remote performance reporting and replacement identification. In addition to the desiccant, the AirMax Pro has an expansion chamber that isolates lubricants from all levels of ambient humidity and a check valve to ensure no excess pressure/vacuum builds. Explosion proof breathers are available by request.

#### ② Oil Sample Port

Allows easy oil sampling for predictive/preventive maintenance procedures. Predictive maintenance of oil can prolong the life of your gear unit.

#### ③ Oil Site Glass with Anti-foam Block

Allows you to easily verify the correct oil level while the gear drive is running. Ensuring the oil level is correct protects the gearing from overheating and unnecessary wear.

## PREVENT DOWNTIME. LOWER COSTS. INCREASE OPERATIONAL RELIABILITY.

You know predictive maintenance prevents downtime, lowers costs and increases operational reliability. The Falk Reliability Package helps with all these goals as you maintain Falk Quadrive Shaft-mounted Gear Reducers.

A proven success among Rexnord customers, this industry-leading standardized package includes options that simplify preventive work and greatly increase efficiency. For more information, ask your Regal Rexnord Account Executive.

- Lifetime guaranteed removal
- Patented TA bushing with mounting from one side
- 3-year warranty
- Grease-purged input seals
- Viton seals as standard

### Standard reliability package

- Includes Falk AirMax Pro Desiccant Breather, oil sampling port, and oil level sight gage with anti-foam block.
- A-6 mounting kit ships separately for field installation.

Contact your Regal Rexnord Account Executive for pricing options.

The following reducers can only be supplied with the AirMax Pro Breather (product number 2931427): 5107J, 5115J, 5203J, 5207J.

Kits are for A-6 mounting position only. Other positions are engineered and require additional two-week lead time to ship with reducer.

### Do you need long-term storage?

Units can be treated with a long-term storage vapor-phase rust inhibitor, and have grease pack in seal cages and sealed to be airtight. All external machined surfaces are coated with Rust Veto 344.

### Available parts for standard reliability package:

Size	Part number
5215J	7708104
5307J/5315J	7708105
5407J	7708106
5415J	7708107
5507J	7708109
5608J	7708108

Note: Chart is organized according to size.
